## Directors' report

The directors present their report and the audited consolidated financial statements for the year ended 31 December 2016.

### Principal activities

The principal activities of the group are the development and the operation of the Portomaso Complex in St. Julians, Malta. This complex includes the Hilton (Malta) and its convention centre, the Portomaso Business Tower, residential apartments, a car park and commercial outlets.

### Review of business

Total revenue for the Spinola Development Group during the year under review reached €41.90 million, a drop of €4.52 million or 10.9% on the 2015 figure. Gross profit at €16.48 million was €2.28 million lower, 12.2% below last year's counterpart figure. The Gross profit margin at 39.3% was 1% below that of 2015, it did however represent the second best recorded by the group. Administrative expenses, net of other income at €7.07 million were €483,897 below that of 2015. This reflects increased wages and salaries and more depreciation, impacted by the refurbishing of the hotel. This was wholly offset by lower operating supplies, lower utilities and operational charges due to the temporary closure of the hotel for refurbishing for the duration of ten weeks between February and April 2016.

This performance led to an operating profit of €9.40 million, a drop of €1.80 million or 16.0% from 2015. On a marginal basis, the drop in operating profit is of two percentage points. Net finance costs at €3.31 million were €217,796 below 2015 leading to a profit before tax of €6.09 million and €1.58 million below the previous year. Taxation at €0.91 million was down on the previous year as a direct result of benefits emanating from investment tax credits and new tax rules on property transactions. Earnings per share have therefore gone down to €0.64 versus €0.70 of the year before.

If we consider the revenue figure by segment, one notes as in the past, the largest share of revenue is derived from the hotel and ancillary operations which accounts for 77.7% of total revenue, about one percentage point over this segment's contribution last year. This follows from the reduction in the property development revenue contribution towards the total for the year. The hotel's performance needs to be seen in the light of its temporary closure already referred to above, during which the bulk of refurbishment programme was undertaken. This refurbishment project which has extended over a number of years is expected to reach €15 million. Bearing this in mind the hotel did very well during the rest of the year, on one hand riding the crest of higher tourism figures to the Island and also exploiting the fresh new look given to the hotel. As in previous years, the hotel KPIs for its category continued to outdo the average MHRA figures and reached into the top scales when compared to its peers.

Cost levels have gone down from last year totally due to the ten-week closure. Therefore, as a percentage of total revenue, total cost is effectively at the same level against income. The refurbishment undertaken will see its full contribution as from 2017 when the hotel will enjoy a full year's operation.

Property sales, as already indicated above, have diminished from €4.05 million last year, by €1.53 million to €2.52 million. This accounts for 6.0% of total revenue, around three percentage points lower than last year. This drop which follows also from the previous year's reduction in sales is a natural result of lower stock level as the finite number of apartments for sale is now practically coming to an end. The units sold numbered two compared to last year leaving a stock of four units. This of course excludes the Laguna apartments which were at the peak of their construction in 2016 and have now, as we report, been fully constructed with finishing works being taken on board. As already noted last year, practically all of these apartments have been sold before reaching final construction and deliveries are now forecast to commence towards the end of this year with the majority targeted for delivery next year.

## **Directors' report** - continued

### **Review of business** - continued

Revenue from rental arrangements and complex management operations accounted for €6.82 million or 16.3% of the total revenue. It is evident that the concept of a well-diversified complex of income-generating activities grants a reduced level of risk and underlines the economic resilience of the Portomaso project.

The Group's balance sheet totalled €181.42 million, an increase of €5.42 million over the previous year. This is accounted for through an increase of €3.39 million in property, plant and equipment, the bulk of which classified as furniture, fittings and operating equipment which is part of the refurbishing already referred to above. Total trade receivables decreased by €1.50 million, mostly in the form of intercompany balances resulting from intercompany treasury transactions. Investment property at €13.75 million reflects a net increase of €742,876 in the form of additions mainly with respect to the new office block next to Portomaso Tower and investments in the Portomaso Gaming Property. As expected, the bulk of the increase in assets is reflected in inventories in the form of property held for re-sale accounted for by the investment made in the stock of the Laguna apartments as these approached full construction stage. Operating trade receivables continued to decrease as a result of tighter credit control policies across the Group. Cash and cash equivalents, net of overdrafts stood at €11.35 million and was €278,794 below the figure as at the end of 2015. Working capital was retained at a very healthy level of 1.46 against 1.75 the previous year.

Group borrowings at €58.29 million were 0.7% below last year, representing the fourth consecutive drop as we utilised internal cash resources for both the hotel refurbishing and the development at the Laguna, this before embarking on the utilisation of external sources which were drawn upon towards the end of the year; with respect to both the hotel and the Laguna. In line with our treasury objectives we continued to negotiate better bank financing rates and managed to reduce our average cost of borrowing from 6.4% to 6%. One must keep in mind that circa 84% of the total borrowings are in the form of long-term fixed rate bonds issued on the local capital market. The mix between capital markets and bank funding as a source of funds mirrors the operational exigencies of the group and hence its cash flow. This mix also provides a high degree of stability particularly in the early stages of the real estate development (the Laguna apartments) and maturing returns from the hotel (following the large scale refurbishing).

The Group's equity increased to €81.39 million up by €3.17 million representing the profit after tax for the year.

Deferred tax at €7.34 million increased by €160,954 due to temporary differences on non-current assets. Dividends at €2.01 million were below those declared in the previous year and more in line with the norm as the high distribution in 2015 was a one-off.

### **Outlook for the financial year ending 2017**

The forecast for 2017 is a positive one indeed, and will continue to build upon past performances at Portomaso. This year we should commence the deliveries of the Laguna apartments which should in itself see a higher turnover in the property development segment of the Group's revenue and hence, crystallising what is considered a satisfactory return on this development. The larger part of these exclusive units will be consigned in 2018 and therefore both revenue and profits would be recorded in that year, despite the fact that a relatively high percentage of the cash in flow from these apartments would have reached us before the actual delivery taking place. Finishing works are currently in hand and should allow a progressive delivery of the first property towards the end of the year. The remaining few apartments in stock outside the Laguna should see deliveries in 2017 and the following year as they are all under promise of sale agreement.

## **Directors' report** - continued

### **Review of business** - continued

#### **Outlook for the financial year ending 2017** - continued

As for the operating side of the activities at Portomaso, as usual these are dominated by the hotel which will enjoy the first full year of operation following the recent major refurbishment. In this respect, we expect occupancy levels to be similar to those of last year, yet at a higher average room rate which should be achievable both as a result of the investment we have put into the hotel and also as a direct effect of the boost in business travellers to the Island as Malta presides over the Council of the European Union. Some further pending refurbishing works are earmarked for this year so as to fully complete our targeted programme. As in the past, it is the owners' objective to maintain and exceed standards at the hotel both with respect to infrastructure and services so as to provide a first class experience to our guests.

Revenue from rental operations and complex management should be on the same degree as last year as the space available for leasing is practically all taken up. It is however, worth noting that a small proportion of the total rentable, commercial area will not be operational this year as we have taken in hand the construction of an office block yielding around 5200 m<sup>2</sup> of gross rentable area. This is being constructed next to the Business Tower. It is envisaged that it will be completed in a year's time and should see the first rental income hitting our cash flow late next year. This is yet another welcomed investment in the Portomaso complex and underlines yet again the demand for first class office space. It is our aim to provide our current clients and newcomers with a holistic product to their business needs as expected from a diversified property as Portomaso.

We therefore aim to end the year with a profit before tax which is superior to that of 2016, mostly as a result of the sale of property referred to above. During the course of this year, the hotel refurbishing works and the building activity at the Laguna should come to an end and this activity is taken over at the new office block referred to above. This leads us to scout for our next project, whether within the Portomaso territory or outside. With this in mind, we are aiming to complete our plans for the Halland residential development, a project which is still at drawing board stage. In line with our overall Group strategy, we will continue to manage our long-term financial requirements so as to retain financial stability and a healthy balance between equity and external borrowings to the project, this for the benefit of our varied stakeholders in Portomaso.

### **Financial risk management**

The group's and company's activities expose it to a variety of financial risks, including market risk (including currency risk, fair value interest rate risk and cash flow interest rate risk), credit risk and liquidity risk. Refer to Note 2 in these financial statements.

### **Results and dividends**

The income statements are set out on page 11. During the year the directors declared a net dividend of €2,014,500 (2015: €11,214,500).

### **Directors**

The directors of the company who held office during the year were:

Raymond Fenech  
Emmanuel Fenech  
Yorgen Fenech

The company's Articles of Association do not require any directors to retire.

## Directors' report - continued

### Statement of directors' responsibilities for the financial statements

The directors are required by the Companies Act, 1995 to prepare financial statements which give a true and fair view of the state of affairs of the group and the parent company as at the end of each reporting period and of the profit or loss for that period.

In preparing the financial statements, the directors are responsible for:

- ensuring that the financial statements have been drawn up in accordance with International Financial Reporting Standards as adopted by the EU;
- selecting and applying appropriate accounting policies;
- making accounting estimates that are reasonable in the circumstances;
- ensuring that the financial statements are prepared on the going concern basis unless it is inappropriate to presume that the group and the parent company will continue in business as a going concern.

The directors are also responsible for designing, implementing and maintaining internal control as the directors determine is necessary to enable the preparation and the fair presentation of the financial statements that are free from material misstatement, whether due to fraud or error, and that comply with the Companies Act, 1995. They are also responsible for safeguarding the assets of the group and the parent company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The financial statements of Spinola Development Company Limited for the year ended 31 December 2016 are included in the Annual Report 2016, which is published in hard-copy printed form and may be made available on the Tumas Group's website. The directors are responsible for the maintenance and integrity of the Annual Report on the website in view of their responsibility for the controls over, and the security of, the website. Access to information published on the group's website is available in other countries and jurisdictions, where legislation governing the preparation and dissemination of financial statements may differ from requirements or practice in Malta.

### Auditors

PricewaterhouseCoopers have indicated their willingness to continue in office and a resolution for their re-appointment will be proposed at the Annual General Meeting.

## *Independent auditor's report*

To the Shareholders of Spinola Development Company Limited

### *Report on the audit of the financial statements*

---

#### *Our opinion*

In our opinion:

- Spinola Development Company Limited's Group and the Parent Company, financial statements (the 'financial statements') give a true and fair view of the Group's and the Parent Company's financial position as at 31 December 2016, and of the Group's and Parent Company's financial performance and cash flows for the year then ended in accordance with International Financial Reporting Standards ('IFRSs') as adopted by the EU; and
- The financial statements have been prepared in accordance with the requirements of the Maltese Companies Act (Cap. 386).

#### **What we have audited**

Spinola Development Company Limited's financial statements, set out on pages 9 to 55, comprise:

- the Consolidated and Parent Company statements of financial position as at 31 December 2016;
- the Consolidated and Parent Company income statement and statements of comprehensive income for the year then ended;
- the Consolidated and Parent Company statements of changes in equity for the year then ended;
- the Consolidated and Parent Company statements of cash flows for the year then ended; and
- the notes to the financial statements, which include a summary of significant accounting policies.

---

#### *Basis for opinion*

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### **Independence**

We are independent of the Group in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) together with the ethical requirements of the Accountancy Profession (Code of Ethics for Warrant Holders) Directive issued in terms of the Accountancy Profession Act (Cap. 281) that are relevant to our audit of the financial statements in Malta. We have fulfilled our other ethical responsibilities in accordance with the IESBA Code.

## *Independent auditor's report - continued*

To the Shareholders of Spinola Development Company Limited

---

### *Other information*

The directors are responsible for the other information. The other information comprises of the Directors' report (but does not include the financial statements and our auditor's report thereon), which we obtained prior to the date of this auditor's report.

Our opinion on the financial statements does not cover the other information, including the directors' report.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

With respect to the directors' report, we also considered whether the directors' report includes the disclosures required by Article 177 of the Maltese Companies Act (Cap. 386).

Based on the work we have performed, in our opinion:

- The information given in the directors' report for the financial year for which the financial statements are prepared is consistent with the financial statements; and
- the directors' report has been prepared in accordance with the Maltese Companies Act (Cap. 386).

In addition, in light of the knowledge and understanding of the company and its environment obtained in the course of the audit, we are required to report if we have identified material misstatements in the directors' report and other information that we obtained prior to the date of this auditor's report. We have nothing to report in this regard.

---

### *Responsibilities of the directors for the financial statements*

The directors are responsible for the preparation of financial statements that give a true and fair view in accordance with IFRSs as adopted by the EU and the requirements of the Maltese Companies Act (Cap. 386), and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group or to cease operations, or have no realistic alternative but to do so.

## *Independent auditor's report - continued*

To the Shareholders of Spinola Development Company Limited - continued

---

### *Auditor's responsibilities for the audit of the financial statements*

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

## *Independent auditor's report - continued*

To the Shareholders of Spinola Development Company Limited

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

### *Report on other legal and regulatory requirements*

---

#### *Other matters on which we are required to report by exception*

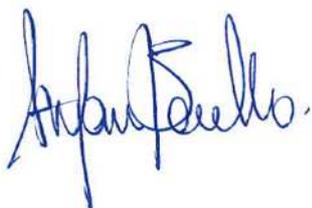

We also have responsibilities under the Maltese Companies Act (Cap. 386) to report to you if, in our opinion:

- Adequate accounting records have not been kept, or that returns adequate for our audit have not been received from branches not visited by us.
- The financial statements are not in agreement with the accounting records and returns.
- We have not received all the information and explanations we require for our audit.
- Certain disclosures of directors' remuneration specified by law are not made in the financial statements, giving the required particulars in our report.

We have nothing to report to you in respect of these responsibilities.

## Notes to the financial statements

### 1. Summary of significant accounting policies

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

#### 1.1 Basis of preparation

These consolidated financial statements include the financial statements of Spinola Development Company Limited and its subsidiaries. The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRSs) as adopted by the EU and the requirements of the Maltese Companies Act, 1995. They have been prepared under the historical cost convention, as modified by the fair valuation of the non-current asset category of property, plant and equipment except as disclosed in the accounting policies below.

The preparation of financial statements in conformity with IFRSs as adopted by the EU requires the use of certain accounting estimates. It also requires directors to exercise their judgement in the process of applying the group's accounting policies (Note 3 - Critical accounting estimates and judgements).

#### *Standards, interpretations and amendments to published standards effective in 2016*

In 2016, the group adopted new standards, amendments and interpretations to existing standards that are mandatory for the group's accounting period beginning on 1 January 2016. The adoption of these revisions to the requirements of IFRSs as adopted by the EU did not result in substantial changes to the group's accounting policies.

#### *Standards, interpretations and amendments to published standards that are not yet effective*

Certain new standards, amendments and interpretations to existing standards have been published by the date of authorisation for issue of these financial statements but are mandatory for the group's accounting periods beginning after 1 January 2016. The group has not early adopted these revisions to the requirements of IFRSs as adopted by the EU and the group's directors are of the opinion that there are no requirements with the possible exception of IFRS 15 that will have a possible significant impact on the group's financial statements in the period of initial application.

IFRS 15, 'Revenue from contracts with customers' deals with revenue recognition and establishes principles for reporting useful information to users of financial statements about the nature, amount, timing and uncertainty of revenue and cash flows arising from an entity's contracts with customers. Revenue is recognised when a customer obtains control of a good or service and thus has the ability to direct the use and obtain the benefits from the good or service. The standard replaces IAS 18 'Revenue' and IAS 11 'Construction contracts' and related interpretations. The standard is effective for annual periods beginning on or after 1 January 2017 and earlier application is permitted. The group and the company are presently assessing the impact of IFRS 15.

## 1. Summary of significant accounting policies - continued

### 1.1 Basis of preparation - continued

*Standards, interpretations and amendments to published standards that are not yet effective - continued*

IFRS 9, 'Financial instruments', addresses the classification and measurement of financial assets, and replaces the multiple classification and measurement models in IAS 39 with a single model that has only two classification categories: amortised cost and fair value. Classification under IFRS 9 is driven by the reporting entity's business model for managing the financial assets and the contractual characteristics of the financial assets. IFRS 9, 'Financial instruments', also addresses the classification and measurement of financial liabilities, and retains the majority of the requirements in IAS 39 in relation to financial liabilities. Subject to adoption by the EU, IFRS 9 is effective for financial periods beginning on, or after, 1 January 2018. The group is considering the implications of the standard and its impact on the group's financial results and position, together with the timing of its adoption taking cognisance of the endorsement process by the European Commission, and will also consider the impact of the remaining phases of IFRS 9 when completed.

IFRS 16, 'Leases' deals lease accounting. Certain operating leases will be recognised in the statement of financial position as an asset (including the right to use the leased item) and a corresponding financial liability to pay rentals. As at the reporting date, the group has non-cancellable operating lease commitments as disclosed in Note 23. However, the group has not yet determined to what extent these commitments will result in the recognition of an asset and a liability for future payments and how this will affect the group's profit and classification of cash flows. Some of the commitments may be covered by the exception for short-term and low-value leases and some commitments may relate to arrangements that will not qualify as leases under IFRS 16. This standard is mandatory for financial years commencing on or after 1 January 2019. At this stage, the group is still in the process of assessing and evaluating the impact of IFRS 16.

### 1.2 Consolidation

#### *Subsidiaries*

Subsidiaries are all entities (including special purpose entities) over which the group has the power to govern the financial and operating policies generally accompanying a shareholding of more than one half of the voting rights. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the group controls another entity. Subsidiaries are fully consolidated from the date on which control is transferred to the group. They are de-consolidated from the date that control ceases.

The group applies the acquisition method of accounting to account for business combinations. The consideration transferred for the acquisition of a subsidiary is the fair values of the assets transferred, the liabilities incurred to the former owners of the acquiree and the equity interests issued by the group. The consideration transferred includes the fair value of any asset or liability resulting from a contingent consideration arrangement. Acquisition-related costs are expensed as incurred. Identifiable intangible assets acquired and liabilities and contingent liabilities assumed (identifiable intangible net assets) in a business combination are measured initially at their fair values at the acquisition date. On an acquisition-by-acquisition basis, the group recognises any non-controlling interest in the acquiree either at fair value or at the non-controlling interest's proportionate share of the recognised amounts of the acquiree's identifiable intangible net assets.

**1. Summary of significant accounting policies - continued**

**1.2 Consolidation - continued**

*Subsidiaries - continued*

Goodwill is initially measured as the excess of the consideration transferred, the amount of any non-controlling interest in the acquiree and the acquisition-date fair value of any previous equity interest in the acquiree over the fair value of the group's share of the identifiable net assets acquired. If this is less than the fair value of the net identifiable assets of the subsidiary acquired in the case of a bargain purchase, the difference is recognised directly in profit or loss (Note 1.6)

Inter-company transactions, balances and unrealised gains on transactions between group companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the group.

In the company's separate financial statements, investments in subsidiaries are accounted for by the cost method of accounting, that is at cost less impairment. Cost includes directly attributable costs of the investments. Provisions are recorded where, in the opinion of the directors, there is an impairment in value. Where there has been an impairment in the value of an investment, it is recognised as an expense in the period in which the diminution is identified. The results of subsidiaries are reflected in the company's separate financial statements only to the extent of dividends receivable. On disposal of an investment, the difference between the net disposal proceeds and the carrying amount is charged or credited to profit or loss.

A listing of the subsidiaries is set out in Note 6 to the consolidated financial statements.

**1.3 Foreign currency translation**

*(a) Functional and presentation currency*

Items included in these financial statements of each of the group's entities are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The financial statements are presented in euro which is the group's and company's functional and presentation currency.

*(b) Transactions and balances*

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are remeasured. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in profit or loss.

All foreign exchange gains and losses are presented in the income statements within 'administrative expenses'.

**1. Summary of significant accounting policies - continued**

**1.4 Property, plant and equipment**

All property, plant and equipment is initially recorded at historical cost. Land and buildings, are shown at fair value based on periodic valuations by qualified valuers, less subsequent depreciation for buildings. Valuations are carried out on a regular basis such that the carrying amount of property does not differ materially from that which would be determined using fair values at the end of the reporting period. Any accumulated depreciation at the date of revaluation is eliminated against the gross carrying amount of the asset, and the net amount is restated to the revalued amount of the asset. All other property, plant and equipment is stated at historical cost less depreciation and impairment losses. Historical cost includes expenditure that is directly attributable to the acquisition of items. Borrowing costs which are incurred for the purpose of acquiring or constructing a qualifying asset are capitalised as part of its cost. Borrowing costs are capitalised while acquisition or construction is actively underway. Capitalisation of borrowing costs is ceased once the asset is substantially complete, and is suspended if the development of the asset is suspended.

Land is shown at market value, based on valuations by qualified valuers. Valuations are carried out periodically when the directors consider it appropriate to do so such that the carrying amount of land does not differ materially from that which would be determined using fair values at the statement of financial position date. Office, hotel and ancillary operational buildings, mechanical and electrical equipment, furniture, fixtures and operational equipment are stated at historical cost less depreciation. Assets in course of construction are not depreciated.

Subsequent costs are included in the asset's carrying amount, or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the group, and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to profit or loss during the financial period in which they are incurred.

Long-term leases are defined as those having a remaining term of more than 50 years. In view of the group's policy of continuous refurbishment of long-term leasehold property, the long estimated useful life of such property and its high residual value, the depreciation charge of such property would in any event, be immaterial.

Increases in the carrying amount arising on revaluation are credited to other comprehensive income and shown as a revaluation reserve in shareholders' equity. Decreases that offset previous increases of the same asset are charged against the revaluation reserve directly in equity. All other decreases are charged to profit or loss. Each year the difference between depreciation based on the revalued carrying amount of the asset charged to profit or loss and depreciation based on the asset's original cost is transferred from the revaluation reserve to retained earnings.

Freehold land and land held on perpetual emphyteusis are not depreciated as they are deemed to have an indefinite life. Depreciation on other assets is calculated using the straight-line method to allocate their cost to their residual values over their estimated useful lives as follows:

	%
Buildings	2 - 14
Mechanical and electrical equipment	5 - 25
Furniture, fixtures and operational equipment	7 - 50

## 1. Summary of significant accounting policies - continued

### 1.4 Property, plant and equipment - continued

The assets' residual values and useful lives are revalued, and adjusted if appropriate, at the end of each reporting period.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount (Note 1.6).

Gains and losses on disposal of property, plant and equipment are determined by comparing proceeds with the carrying amount and are recognised in profit or loss. When a revalued asset is sold, the amount is included in the revaluation reserve relating to the asset and is transferred to retained earnings.

### 1.5 Investment property

Investment property, principally comprising floors in the Portomaso Business Tower and commercial outlets, are held for long-term rental yields and are not occupied by the group.

The group adopts the cost model under IAS 40, 'Investment property', whereby investment property is stated in the statement of financial position at historical cost less accumulated depreciation and impairment losses. Historical cost includes expenditure that is directly attributable to the acquisition of the items. Borrowing costs which are incurred for the purpose of acquiring or constructing a qualifying investment property are capitalised as part of its cost. Borrowing costs are capitalised while acquisition or construction is actively underway. Capitalisation of borrowing costs is ceased once the asset is substantially complete and is suspended if the development of the asset is suspended.

Subsequent expenditure is capitalised to the asset's carrying amount only when it is probable that future economic benefits associated with the expenditure will flow to the group and the cost of the item can be measured reliably. All other repairs and maintenance costs are charged to profit or loss during the financial period in which they are incurred. When part of an investment property is replaced, the carrying amount of the replaced part is derecognised.

Land is not depreciated as it is deemed to have an indefinite life. The capitalised costs of buildings is depreciated using the straight-line method over a maximum of one hundred years at most, in accordance with their useful lives. Useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

The fair value of these properties is disclosed in the financial statements and is based on active market prices, taking into consideration the nature, location or condition of the specific asset. These valuations are revised annually by the directors.

A property's carrying amount is written down immediately to its recoverable amount if its carrying amount is greater than its estimated recoverable amount (Note 1.6).

Investment properties are derecognised either when they have been disposed of or when the investment property is permanently withdrawn from use and no future economic benefit is expected from its disposal. Gains and losses on disposals are determined by comparing the proceeds with carrying amount and are recognised in profit or loss.

**1. Summary of significant accounting policies - continued**

**1.5 Investment property - continued**

If an investment property becomes owner-occupied, it is reclassified as property, plant and equipment. Its cost and accumulated amortisation at the date of the reclassification becomes its cost and accumulated depreciation for subsequent accounting purposes. When the group decides to dispose of an investment property without development, the group continues to treat the property as an investment property. Similarly, if the group begins to redevelop an existing investment property for continued future use as investment property, it remains an investment property during the redevelopment.

If an item of property, plant and equipment becomes an investment property because its use has changed, its cost and accumulated depreciation at the date of reclassification becomes its cost and accumulated amortisation for subsequent accounting purposes.

Where an investment property undergoes a change in use, evidenced by commencement of development with a view to sale, the property is transferred to inventories. A property's deemed cost for subsequent accounting inventories is its carrying amount at the date of change in use

**1.6 Impairment of non-financial assets**

Assets that have an indefinite useful life are not subject to amortisation and are tested annually for impairment. Assets that are subject to amortisation or depreciation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units). Non-financial assets that suffered an impairment are reviewed for possible reversal of the impairment at the end of each reporting period.

**1.7 Financial assets**

*1.7.1 Classification*

The group classifies its financial assets (other than in the company's case, investments in subsidiaries) in the loans and receivables category. The classification depends on the purpose for which the financial assets were acquired. Management determines the classification of its financial assets at initial recognition.

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They arise when the group provides money, goods or services directly to a debtor with no intention of trading the asset. They are included in current assets, except for maturities greater than twelve months after the end of the reporting period. These are classified as non-current assets. The group's loans and receivables comprise 'trade and other receivables' and 'cash and cash equivalents' in the statement of financial position (Notes 1.9 and 1.10).

*1.7.2 Recognition and measurement*

The group recognises a financial asset in its statement of financial position when it becomes a party to the contractual provisions of the instrument. Regular way purchases and sales of financial assets are recognised on the trade date, which is the date on which the company commits to purchase or sell the asset.

## 1. Summary of significant accounting policies - continued

### 1.7 Financial assets - continued

#### 1.7.2 Recognition and measurement - continued

Financial assets are initially recognised at fair value plus transaction costs. Loans and receivables are subsequently carried at amortised cost using the effective interest method. Amortised cost is the initial measurement amount adjusted for the amortisation of any difference between the initial and maturity amounts using the effective interest method.

Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the group has transferred substantially all risks and rewards of ownership or has not retained control of the asset.

#### 1.7.3 Impairment

The group assesses at the end of each reporting period whether there is objective evidence that a financial asset or a group of financial assets is impaired. A financial asset or a group of financial assets is impaired and impairment losses are incurred only if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a 'loss event') and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated. The group first assesses whether objective evidence of impairment exists. The criteria that the group uses to determine that there is objective evidence of an impairment loss include:

- significant financial difficulty of the issuer or obligor;
- a breach of contract, such as a default or delinquency in interest or principal payments;
- it becomes probable that the borrower will enter bankruptcy or other financial reorganisation.

For financial assets carried at amortised cost, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The asset's carrying amount is reduced and the amount of the loss is recognised in profit or loss. If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised (such as an improvement in the debtor's credit rating), the reversal of the previously recognised impairment loss is recognised in profit or loss.

### 1.8 Inventories

Inventories are stated at the lower of cost and net realisable value, and include transport and handling costs, determined on a weighted average basis. Net realisable value is the estimated selling price in the ordinary course of business, less applicable selling expenses.

#### *Property held for development and resale*

When the main object of a property project is the development for resale purposes, the asset is classified in the financial statements as inventory. Any elements of the project which are identified for business operation or long-term investments properties are transferred at their carrying amount or fair value to property, plant and equipment or investment property when such identification is made and the cost thereof can be reliably segregated.

The development property is carried at the lower of cost and net realisable value. The purchase cost of acquiring the property represents the cash equivalent value of the contracted price. In case of land previously held as tangible non-current assets, the transfer value is the carrying value of the land as last revalued prior to its transfer to inventories.

**1. Summary of significant accounting policies - continued**

**1.8 Inventories - continued**

Cost comprises the purchase cost of acquiring the property together with other costs incurred during its subsequent development by specifically identifying the cost of individual items including:

- The costs incurred on development works and construction works in progress, including demolition, site clearance, excavation, construction and acquisition costs, together with the expenses incidental to acquisition and costs of ancillary activities such as site security;
- The cost of various design and other studies conducted in connection with the project, together with all other expenses incurred in connection therewith;
- Any borrowing costs, including imputed interests, attributable to the development phases of the property project;
- Net realisable value is the estimated selling price in the ordinary course of business, less the costs of completion and selling expenses.

Gains and losses on disposal of property inventories are determined by reference to their carrying amount and are taken into account in determining gross profit. On disposal of a revalued asset, amounts in the revaluation reserve relating to that asset are transferred to retained earnings.

**1.9 Trade and other receivables**

Trade receivables comprise amounts due from customers for property sold or services performed and rendered in the ordinary course of the group's business. If collection is expected in one year or less (or in the normal operating cycle of the business if longer), they are classified as current assets. If not, they are presented as non-current assets.

Trade and other receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment (Note 1.7.3). The carrying amount of the asset is reduced through the use of an allowance account, and the amount of the loss is recognised in profit or loss within cost of sales and administrative expenses. When a receivable is uncollectible, it is written off against the allowance account for trade and other receivables. Subsequent recoveries of amounts previously written off are credited against profit or loss.

**1.10 Cash and cash equivalents**

Cash and cash equivalents are carried in the statement of financial position at face value. In the statement of cash flows, cash and cash equivalents include cash in hand and deposits held at call with banks and bank overdrafts. In the statement of financial position, bank overdrafts are included within borrowings in current liabilities.

**1.11 Share capital**

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction, net of tax, from the proceeds.

**1. Summary of significant accounting policies - continued**

**1.12 Financial liabilities**

The group recognises a financial liability in its statement of financial position when it becomes a party to the contractual provisions of the instrument. The group's financial liabilities are classified as financial liabilities which are not at fair value through profit or loss (classified as 'Other liabilities') under IAS 39. Financial liabilities not at fair value through profit or loss are recognised initially at fair value, being the fair value of consideration received, net of transaction costs that are directly attributable to the acquisition or the issue of the financial liability. These liabilities are subsequently measured at amortised cost. The group derecognises a financial liability from its statement of financial position when the obligation specified in the contract or arrangement is discharged, is cancelled or expires.

**1.13 Trade and other payables**

Trade payables comprise obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Accounts payable are classified as current liabilities if payment is due within one year or less (or in the normal operating cycle of the business if longer). If not, they are presented as non-current liabilities.

Trade and other payables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method.

**1.14 Borrowings**

Borrowings are recognised initially at the fair value of proceeds received, net of transaction costs incurred. Borrowings are subsequently carried at amortised cost; any difference between proceeds (net of transaction costs) and the redemption value is recognised in profit or loss over the period of the borrowings using the effective interest method. Borrowings are classified as current liabilities unless the group has an unconditional right to defer settlement of the liability for at least twelve months after the end of the reporting period.

Issue costs incurred in connection with the issue of the secured bonds and loans from fellow subsidiaries include mainly arraignment, manager fees and professional fees.

**1.15 Offsetting financial instruments**

Financial assets and liabilities are offset and the net amount reported in the statement of financial position when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously.

**1.16 Current and deferred tax**

The tax expense for the period comprises current and deferred tax. Tax is recognised in the profit or loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at the end of the reporting period, and any adjustment to tax payable in respect of previous years.

**1. Summary of significant accounting policies - continued**

**1.16 Current and deferred tax - continued**

Deferred tax is recognised, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. However, deferred tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the end of the reporting period and are expected to apply when the related deferred tax asset is realised or the deferred tax liability is settled.

Under this method the group is required to make provision for deferred income taxes on the revaluation of certain property assets on the difference between the carrying values or financial reporting purposes and their tax base. Such deferred tax is charged or credited directly to the reserve.

Deferred tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred income tax assets and liabilities relate to income taxes levied by the same taxation authority on either the taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

**1.17 Provisions**

Provisions for legal claims are recognised when the group has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and the amount has been reliably estimated. Provisions are not recognised for future operating losses.

Provisions are measured at the present value of the expenditures expected to be required to settle the obligation using a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the obligation. The increase in the provision due to passage of time is recognised as finance costs.

**1.18 Revenue recognition**

Revenue comprises the fair value of the consideration received or receivable for the sale of goods and services in the ordinary course of the group's activities. Revenue is shown net of value-added tax or other sales taxes, returns, rebates and discounts.

The group recognises revenue when the amount of revenue can be reliably measured, when it is probable that future economic benefits will flow to the entity and when specific criteria have been met for each of the group's activities as described below.

**1. Summary of significant accounting policies - continued**

**1.18 Revenue recognition - continued**

Sales are recognised upon delivery of products or performance of services, and are included in the financial statements as revenue. Revenue is recognised as follows:

*(a) Property sales*

Property sales are recognised when the significant risks and rewards of ownership of the property being sold are effectively transferred to the buyer. This is generally considered to occur at the later of the contract of sale and the date when all the group's obligations relating to the property are completed and the possession of the property can be transferred in the manner stipulated by the contract of sale. Amounts received in respect of sales that have not yet been recognised in the financial statements, due to the fact that the significant risks and rewards of ownership still rest with the group, are treated as advance deposits received and included with current payables.

*(b) Sales of services in the hospitality activity*

Revenue from services is generally recognised in the accounting period in which the services are rendered, by reference to completion of the specific transaction assessed on the basis of the actual service provided as a proportion of the total services to be provided. Revenue arising on hospitality activities are recognised when the service is performed and goods are supplied. Revenue is usually in cash, credit card or on credit. The recorded revenue, includes credit card fees payable for the transaction.

*(c) Sales of goods - retail*

Sales of goods are recognised when the group has delivered products to the customer and there is no unfulfilled obligation that could affect the customer's acceptance of the products. Delivery does not occur until the risks of obsolescence and loss have been transferred to the customer, and the customer has accepted the products. Retail sales are usually in cash or by credit card. The recorded revenue includes credit card fees payable for the transaction. Such fees are included in finance costs. Restaurant and bar sales are recognised upon performance of the service.

*(d) Sales of services*

Sales of services including income from marina, car park and complex management are recognised in the accounting period in which the services are provided, by reference to completion of the specific transaction assessed on the basis of the actual service provided as a proportion of the total services to be provided.

*(e) Property rentals and related income*

Rentals receivable, short-term lets receivable and premia charged to tenants of immovable property are recognised in the period when the property is occupied. Premia are taken to the income statement over the period of the leases to which they relate.

*(f) Dividend income*

Dividend income is recognised when the right to receive payment is established.

**1. Summary of significant accounting policies - continued**

**1.19 Institutional grants**

Grants that compensate the company for expenses incurred are recognised in the income statement on a systematic basis in the same reporting periods in which the expenses are incurred. This compensation is disclosed in the same reporting line as the related expense.

Institutional grants are recognised in the statement of financial position initially as deferred income when there is reasonable assurance that they will be received and that the company will comply with the conditions attaching to them.

Grants that compensate the company for the cost of an asset are recognised in the income statement on a systematic basis over the useful life of the asset to match the depreciation charge. Capital grants are recorded as deferred income and released to the income statement over the estimated life of the related assets.

**1.20 Finance income and costs**

Finance income and costs are recognised in profit or loss for all interest-bearing instruments on an accrual basis using the effective interest method.

When a receivable is impaired, the group reduces the carrying amount to its recoverable amount, being the estimated future cash flows discounted at the original effective interest rate of the instrument, and continues unwinding the discount as interest income. Interest income on impaired loans is recognised using the original effective interest rate. Finance costs includes the effect of amortising any difference between net proceeds and redemption value in respect of the group's borrowings.

**1.21 Operating leases**

*Where the group is a lessor*

Assets leased out under operating leases are included in investment property in the statement of financial position. They are depreciated over their expected useful lives on a basis consistent with similar owned investment property. Rental income is recognised as it accrues, unless collectibility is in doubt.

**1.22 Borrowing costs**

Borrowing costs which are incurred for the purpose of acquiring or constructing qualifying property, plant and equipment, investment property or property held for development and resale are capitalised as part of its cost. Borrowing costs are capitalised while acquisition or construction is actively underway, during the period of time that is required to complete and prepare the asset for its intended use. Capitalisation of borrowing costs is ceased once the asset is substantially complete and is suspended if the development of the asset is suspended. All other borrowing costs are expensed. Borrowing costs are recognised for all interest-bearing instruments on an accrual basis using the effective interest method. Interest costs include the effect of amortising any difference between initial net proceeds and redemption value in respect of the group's interest-bearing borrowings.

**1. Summary of significant accounting policies - continued**

**1.23 Dividend distribution**

Dividend distribution to the company's shareholders is recognised as a liability in the group's and company's financial statements in the period in which the dividends are approved by the company's shareholders.

**1.24 Earnings per share**

The group presents basic earnings per share (EPS) data for its ordinary shares. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the company by the weighted average number of ordinary shares outstanding during the period.

**2. Financial risk management**

**2.1 Financial risk factors**

The group's activities potentially expose it to a variety of financial risks: market risk (including currency risk, fair value interest rate risk and cash flow interest rate risk), credit risk and liquidity risk. The group's overall risk management, covering risk exposures for all subsidiaries focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the group's financial performance.

The board of directors provides principles for overall group risk management, as well as policies covering risks referred to above and specific areas such as investment of excess liquidity. Risk management is carried out by a central treasury department (group treasury) under policies approved by the board of directors. The group did not make use of derivative financial instruments to hedge certain risk exposures during the current and preceding financial years.

**2. Financial risk management - continued**

**2.1 Financial risk factors - continued**

*(a) Market risk*

(i) Foreign exchange risk

Foreign exchange risk arises from future commercial transactions and recognised assets and liabilities which are denominated in a currency that is not the respective group's functional currency.

The group is exposed to foreign exchange risk arising primarily from the group's purchases, a part of which are denominated in the US dollar. Management does not consider foreign exchange risk attributable to recognised liabilities arising from purchase transactions to be significant since balances are settled within very short periods in accordance with the negotiated credit terms. Also foreign exchange risk attributable to future transactions is not deemed to be material since the group manages the risk by reflecting, as far as is practicable, the impact of exchange rate movements registered with respect to purchases in the respective sales prices.

All the group's loans and receivables, cash and cash equivalent and borrowings are denominated in euro.

Accordingly, a sensitivity analysis for foreign exchange risk disclosing how profit or loss and equity would have been affected by changes in foreign exchange rates that were reasonably possible at the end of reporting year is not deemed necessary.

(ii) Cash flow and fair value interest rate risk

The group does not have significant interest-bearing assets, and its income and operating cash flows are substantially independent of changes in market interest rates. The group's interest rate risk arises from long-term borrowings. Borrowings issued at variable rates, comprising bank borrowings (Note 12), expose the group to cash flow interest rate risk. The group's borrowings are subject to an interest rate that varies according to revisions made to the Bank's Base Rate. Management monitors the level of floating rate borrowings as a measure of cash flow risk taken on. Borrowings issued at fixed rates, consisting primarily of loans from fellow subsidiaries which are carried at amortised cost (Note 12) and therefore do not expose the group to cash flow and fair value interest rate risk.

Based on the above, management considers the potential impact on profit or loss of a defined interest rate shift that is reasonably possible at the end of the reporting period to be immaterial.

*(b) Credit risk*

Credit risk arises from cash and cash equivalents, deposits with banks, loans and receivables, intra-group receivables as well as credit exposures to customers, including outstanding receivables and committed transactions. The carrying amount of financial assets represents the maximum credit exposure.

**2. Financial risk management - continued**

**2.1 Financial risk factors - continued**

*(b) Credit risk - continued*

The maximum exposure to credit risk at the end of the reporting period was:

	<b>Group</b>		<b>Company</b>	
	<b>2016</b>	2015	<b>2016</b>	2015
	€	€	€	€
<b>Carrying amounts</b>				
Trade and other receivables (Note 7)	<b>23,029,052</b>	24,965,765	<b>22,266,456</b>	25,908,461
Cash and cash equivalents (Note 9)	<b>11,349,311</b>	11,628,105	<b>11,298,784</b>	11,551,941
	<b>34,378,368</b>	36,593,870	<b>33,565,240</b>	37,460,402

The maximum exposure to credit risk at the end of the reporting period in respect of the trade receivables by type of customer was:

	<b>Group</b>		<b>Company</b>	
	<b>2016</b>	2015	<b>2016</b>	2015
	€	€	€	€
Property development and management	<b>1,243,517</b>	1,679,689	<b>488,852</b>	496,318
Hospitality	<b>1,660,270</b>	2,104,999	<b>1,660,270</b>	2,104,999
	<b>2,903,787</b>	3,784,668	<b>2,149,122</b>	2,601,317

The group and the company holds collateral as security for the receivables within the property related sector for an amount of €65,000 (2015: €65,862).

The group only banks with local financial institutions with high quality standing or rating. The group's operations are carried out in Malta. The group has no concentration of credit risk that could materially impact the sustainability of its operations.

The group assesses the credit quality of its customers taking into account financial position, past experience and other factors. It has policies in place to ensure that sales of products and services are effected to customers with an appropriate credit history in the case of credit sales. Sales to retail customers are made in cash or via major credit cards. The group monitors the performance of these financial assets on a regular basis to identify incurred collection losses which are inherent in the group's receivables taking into account historical experience in collection of accounts receivable.

The group's receivables, which are not impaired financial assets, are principally in respect of transactions with customers for whom there is no recent history of default. Management does not expect any material losses from non-performance by these customers.

Impairment provisions for the group and company of €564,812 (2015: €578,065) and €381,827 (2015: €422,454) respectively were made at the year-end in respect of receivables that were overdue and that were not expected to be recovered. Other overdue debts that were not impaired were in large part settled since the year end. Moreover the group holds security of €65,000 (2015: €65,862) against the respective debts.

**2. Financial risk management - continued**

**2.1 Financial risk factors - continued**

*b) Credit risk - continued*

The movement in the allowance for impairment in respect of trade and other receivables during the year was as follows:

	<b>Group</b>		<b>Company</b>	
	<b>2016</b>	2015	<b>2016</b>	2015
	€	€	€	€
At 1 January	<b>578,065</b>	600,357	<b>422,454</b>	478,736
Decrease in impairment provision for the year	<b>(13,253)</b>	(22,292)	<b>(40,626)</b>	(56,282)
	<b>564,812</b>	578,065	<b>381,828</b>	422,454

The allowance accounts in respect of trade receivables are used to record impairment losses unless the group is satisfied that no recovery of the amount owing is possible; at this point the amounts considered irrecoverable are written off against trade receivables directly.

The group's receivables include significant amounts due from related parties forming part of the Tumas Group of companies (Note 7). The group's treasury monitors intra-group credit exposures at individual entity level on a regular basis and ensures timely performance of these assets in the context of overall group liquidity management. The group assesses the credit quality of these related parties taking into account financial position, performance and other factors. The group takes cognisance of the related party relationship with these entities and management does not expect losses from non-performance or default.

*(c) Liquidity risk*

The group is exposed to liquidity risk in relation to meeting future obligations associated with its financial liabilities, which comprise principally 'trade and other payables' and 'interest-bearing borrowings' (Notes 12 and 13). Prudent liquidity risk management includes maintaining sufficient cash and committed credit lines to ensure the availability of an adequate amount of funding to meet the group's obligations.

Management monitors liquidity risk by means of cash flow forecasts on the basis of expected cash flows over a twelve month period detailed by the group segments to ensure that no additional financing facilities are expected to be required over the coming year.

Moreover, annual detailed cash flow projections are prepared to assess the matching of cash inflows and outflows arising from expected maturities of financial instruments. The group manages its liquidity risk through this continuous assessment, coupled with the group's committed borrowing facilities (that it can access) to meet liquidity needs as referred to previously.

**2. Financial risk management - continued**

**2.1 Financial risk factors - continued**

*(c) Liquidity risk - continued*

The carrying amounts of the group's assets and liabilities are analysed into relevant maturity groupings based on the remaining period at the statement of financial position to the contractual maturity date in the respective notes to the financial statements.

The following table analyses the group's and company's financial liabilities into relevant maturity groupings based on the remaining period at the statement of financial position to the contractual maturity date.

The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within twelve months equal their carrying balances, as the impact of discounting is not significant.

<b>Group</b>	Carrying amount €	Contractual cash flows €	Within one year €	One to five years €	Over five years €

**2. Financial risk management - continued**

**2.2 Capital risk management**

The capital of the group is managed with a view of maintaining a controlled relationship between capital and structural borrowings in order to maintain an optimal capital structure which reduces the cost of capital. To maintain or adjust its capital structure, the group may adjust the amount of dividends paid to shareholders, issue new shares or sell assets to reduce debt.

The group monitors capital on the basis of the gearing ratio. This ratio is calculated as structural borrowings divided by total capital.

Total capital is measured by reference to the amounts reflected in the consolidated financial statements where the property, plant and equipment are stated at revalued amounts that are regularly assessed and updated as necessary.

Equity includes a portion of revaluation surplus on property not yet released dating back to 1994 when property inventory was reclassified from non-current assets. Reported equity is adjusted for fair value surplus (net of deferred tax) over the notional carrying amount of investment property. No account is taken of further fair value surplus on trading property inventory within the Portomaso development since that date.

Furthermore, the group has not taken account of potential fair value surpluses related to a number of undeveloped properties within its inventory portfolio. These properties comprise namely, the Halland land, the directium dominium related to the Portomaso land as well as the land utilised for the Laguna Apartments project. The directors consider the potential increase over the recorded base cost from the respective revaluations as latent equity which will be realized when the respective property earning potential is crystalized.

Structural borrowings include all interest bearing borrowings stated net of any funds made available for the repayment of such liabilities. Borrowings include loans from a fellow subsidiary (Tumas Investments p.l.c.) whose unsecured bonds and bank borrowings are secured and guaranteed by the company.

**2. Financial risk management - continued**

**2.2 Capital risk management - continued**

The gearing ratios at 31 December 2016 and 2015 were as follows:

	<b>2016</b>	<b>Group</b>
	<b>€</b>	<b>2015</b>
		<b>€</b>
Total borrowings (Note 12)	<b>58,290,294</b>	58,723,158

<b>Total capital</b>	<b>138,294,157</b>	137,520,212
	<hr/>	
<b>Gearing</b>	<b>28%</b>	29%
	<hr/>	

**2.3 Fair values of financial instruments**

The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques. The group uses as a variety of methods and makes assumptions that are based on market conditions existing at the end of each reporting period.

Other techniques, such as estimated discounted cash flows, are used to determine fair value for the remaining financial instruments.

The carrying amounts of cash at bank, trade receivables (net of impairment provisions), payables and borrowings are assumed to approximate their fair values. The fair value of financial liabilities for disclosure purposes is estimated by discounting the future contractual cash flows at the current market interest rate that is available to the group for similar financial instruments.

As at the end of the reporting period, the fair values of financial assets and liabilities, approximate the carrying amounts shown in the statement of financial position.

**3. Critical accounting estimates and judgements**

Estimates and judgements are continually evaluated and based on historical experience and other factors including expectations of future events that are believed to be reasonable under the circumstances.

In the opinion of the directors, the accounting estimates and judgements made in the course of preparing these financial statements are not difficult, subjective or complex to a degree which would warrant their description as critical in terms of the requirements of IAS 1.

As referred to in Note 4 to the financial statements, the group's and company's land and buildings category of property, plant and equipment was re-valued on 31 December 2015 by the directors on the basis of professional advice, which considers forecasted net potential returns for the property.

#### 4. Property, plant and equipment - continued

##### *Fair valuation of property*

On 31 December 2015, the directors approved the revaluation of the group's and company's property, plant and equipment, which comprises the Hilton Hotel, the Portomaso car park and related ancillary operations, after assessing the valuations prepared by professionally qualified valuers. The valuation was made on the basis on fair market value after considering the intrinsic value of the property and net potential returns. The book value of the property has been adjusted to the revaluation and the resultant surplus, net of applicable deferred income taxes, has been credited to the revaluation reserve in other comprehensive income within shareholders' equity (Note 11).

The group and the company are required to analyse non-financial assets carried at fair value by level of the fair value hierarchy within which the recurring fair value measurements are categorised in their entirety (Level 1, 2 or 3). The different levels of the fair value hierarchy have been defined as fair value measurements using:

- Quoted prices (unadjusted) in active markets for identical assets (Level 1);
- Inputs other than quoted prices included within Level 1 that are observable for the asset, either directly (that is, as prices) or indirectly (that is, derived from prices) (Level 2);
- Inputs for the asset that are not based on observable market data (that is, unobservable inputs) (Level 3).

The group's and the company's land and buildings, within property, plant and equipment, comprises the properties described above; investment property (Note 5) comprises principally the Portomaso Business Tower and commercial outlets leased out principally to third parties. Certain areas within this portfolio are also rented out to fellow subsidiaries within the Tumas group. All the recurring property fair value measurements at 31 December 2016 use significant unobservable inputs and are accordingly categorised within Level 3 of the fair valuation hierarchy.

The directors assessed the valuation in respect of the company's investment property on valuation reports prepared by a professionally qualified valuer issued for 2016. Valuations were made on the basis of open market value after considering the returns being attained by the property and its intrinsic value.

The group's and the company's policy is to recognise transfers into and out of fair value hierarchy levels as of the beginning of the reporting period. There were no transfers between different levels of the fair value hierarchy during the year ended 31 December 2016.

A reconciliation from the opening balance to the closing balance of land and buildings for recurring fair value measurements categorised within Level 3 of the value hierarchy, is reflected in the table above. Besides the above noted revaluation surplus, the other movements reflect additions, disposals and depreciation for the year ended 31 December 2016.

##### *Valuation processes*

The valuations of the properties are performed regularly taking into consideration valuation reports prepared by qualified valuers. These reports are based on both:

- information provided by the group which is derived from the group's financial systems and is subject to the group's overall control environment; and
- assumptions and valuation models used by the valuers – the assumptions are typically market related. These are based on professional judgement and market observation.

#### 4. Property, plant and equipment - continued

The information provided to the valuers, together with the assumptions and the valuation models used by the valuers, are reviewed by the board of directors and top officials within the group's finance function. This includes a review of fair value movements over the period.

##### *Valuation techniques*

Given the specific nature of these assets, the valuations of the Level 3 property have been performed by reference to valuation models. These valuation models include:

- in the case of the Hilton Hotel, the Portomaso car park and related ancillary operations classified as property, plant and equipment, the property, plant and equipment's discounted projected cash flows; and
- in the case of the Portomaso Business Tower and commercial outlets leased out and classified as investment property, the annual rental value earned, capitalised at a rate ranging from 6% to 12% that reflects the risks inherent in the utilisation of the specific properties.

The future cash flows from operating the Hilton Hotel and related ancillary operations (including the Portomaso car park) have been derived from financial forecasts assessed in relation to past performance and the industry's general outlook. The significant inputs to this approach include:

Net cash inflows	based on the actual operating net cash inflows generated and projected forwards for a nine year period. These cash flows take into consideration periodic capital expenditure based on expected refurbishment costs that will be incurred over the period of projections.
Growth rate	based on management's estimated average growth in the hotel's operating cash flows; and
Discount rate	reflecting current market assessments of the uncertainty in the amount and timing of cash flows, and based on current market risk free rates, an equity market risk premium and other risk premiums attached to an investment in the property being valued including any element of projection risk inherent in the projected future cash flows;
Terminal value	based on the properties' net operating cash flows at the end of the ten year projection period, and capitalised at a capitalisation rate that reflects the properties' actual location, size and quality and taking into account market data at the valuation date.

The significant unobservable inputs in the valuation of the Portomaso Business Tower and commercial outlets leased out include the average annual rental value of the properties, and a capitalisation rate that reflects the properties' actual location, size and quality and taking into account market data at the valuation date.

Information about fair value measurements of property, plant and equipment using significant unobservable inputs (Level 3) include pre tax net cash flows of €10 million with an average growth rate of 1% discounted at an average rate of 7%

In respect of these valuations, the higher the pre-tax operating cash inflows, growth rate, and terminal value, the higher the fair value. Conversely, the lower the discount rate, the estimated

#### 4. Property, plant and equipment - continued

refurbishment costs, and capitalisation rate used in calculating the terminal value, the higher the fair value.

As at 31 December 2016, the carrying amount of land within property, plant and equipment amounts to €55,922,218 (2015: €55,922,218). The carrying amount of land would have been €863,468 (2015: €863,468) had the assets been included in the financial statements at cost.

Depreciation charge of €5,215,587 (2015: €4,427,750) is included in the group's and company's income statements as follows: €5,196,802 (2015: €4,377,194) in cost of sales and €18,785 (2015: €50,556) in administrative expenses.

Borrowings are secured by the group's property, plant and equipment (Note 12).

#### 5. Investment property

	<b>Group and Company</b>	
	<b>2016</b>	<b>2015</b>
	€	€
<b>Year ended 31 December</b>		
Opening net book amount	<b>12,992,319</b>	15,794,397

<b>At 31 December</b>		
Cost or valuation	<b>21,596,404</b>	20,278,972
Accumulated depreciation	<b>(7,861,209)</b>	(7,286,653)
Net book amount	<b>13,735,195</b>	12,992,319

As at 1 January 2015, the cost and accumulated depreciation of the group's and company's investment property amounted to €23,236,959 and €7,442,562 respectively.

During 2014, the company commenced construction works on the Laguna units. In line the Group's intention to retain portions of this complex for rental purposes, the related construction costs were categorised within investment property. This project was reclassified under property held for resale in 2015 following the change in intended use decided by management (Note 8).

Borrowings are secured by the group's investment property (Note 12).

Depreciation charge of €608,934 (2015: €689,272) is included in cost of sales.

The fair open market value of investment property as at 31 December 2016 is estimated by the directors at €34,445,199 (2015: €34,145,823) on the basis of the present value of contracted and anticipated income streams from the property concerned.

The vast majority of the above noted investment property is presently leased out under operating leases to third parties and related parties within the Tumas Group.

<b>Total trade and other receivables</b>	<b>25,404,985</b>	26,913,601	<b>24,551,706</b>	27,781,026

Amounts owed by parents, subsidiaries, fellow subsidiaries and related parties are unsecured, interest free and are repayable. The directors do not expect that related amounts disclosed as non-current are settled within the next twelve months. The company's exposure to liquidity risk related to trade and other receivables is disclosed in Note 2.

Included within amounts owed by fellow subsidiaries and parents are funds of €7,317,048 (2015: €5,887,909) which have been advanced as part of the Tumas Group treasury function. These amounts can be re-allocated to the company's banking accounts after year end at the company's request.

Receivables above are stated net of provision for impairment of receivables:

	<b>Group</b>		<b>Company</b>	
	<b>2016</b>	2015	<b>2016</b>	2015
	€	€	€	€
Trade receivables	<b>564,812</b>	578,065	<b>381,828</b>	422,454

Other receivables include funds utilised for projects on property owned by fellow subsidiaries which is still not commissioned. Upon commissioning, these assets will be recovered by the company from the respective fellow subsidiary. Advanced payments on projects relate to funds advanced to suppliers not yet utilised for development works as at year end. These mainly relate to the refurbishment of the Hilton Malta, the Laguna Development and the New Office Block next to Portomaso Business Tower.

**7. Trade and other receivables - continued**

The provision for impairment of receivables for the year is disclosed in Note 16 and is included in the income statement as follows:

	<b>Group</b>		<b>Company</b>	
	<b>2016</b>	2015	<b>2016</b>	2015
	€	€	€	€
Cost of sales	<b>(132)</b>	(525)	<b>(132)</b>	(525)
Administrative expenses	<b>(13,121)</b>	(21,767)	<b>(40,494)</b>	(55,757)
	<b>(13,253)</b>	(22,292)	<b>(40,626)</b>	(56,282)

The group's exposure to credit and currency risks and impairment losses relating to trade receivables are disclosed in Note 2. The other classes within receivables do not contain impaired assets.

**8. Inventories**

	<b>Group</b>		<b>Company</b>	
	<b>2016</b>	2015	<b>2016</b>	2015
	€	€	€	€

Disposals of property stock	<b>(244,896)</b>	(160,424)
	<b>665,198</b>	910,094
Deferred taxation (Note 14)	<b>(36,732)</b>	(61,222)
<b>At 31 December</b>	<b>628,446</b>	848,872

The revaluation reserves are non-distributable reserves.

**12. Borrowings**

	<b>Group and Company</b>	
	<b>2016</b>	<b>2015</b>
	<b>€</b>	<b>€</b>
<b>Non-current</b>		
Bank loans	<b>4,866,635</b>	7,901,862
Loans from fellow subsidiary	<b>49,218,761</b>	49,177,617
	<b>54,085,396</b>	57,079,479
<b>Current</b>		
Bank overdrafts	<b>423,531</b>	393,679
Bank loans	<b>3,781,367</b>	1,250,000
	<b>4,204,898</b>	1,643,679
<b>Total borrowings</b>	<b>58,290,294</b>	58,723,158

The bank loans and overdrafts are secured by:

- (a) general and special hypothecs over the group's assets;
- (b) general hypothecs and guarantees provided by fellow subsidiaries;
- (c) pledges on the group's insurance policies;
- (d) letters of undertaking.

The group's and company's banking facilities as at 31 December 2016 amounted to €22,423,728 (2015: €21,944,560).

Loans from fellow subsidiary are disclosed at the value of the proceeds less the net book amount of the issue costs, as follows:

	<b>Group and Company</b>	
	<b>2016</b>	<b>2015</b>
	<b>€</b>	<b>€</b>
Face value of loans from fellow subsidiary	<b>49,379,595</b>	49,379,595
Issue costs	<b>325,514</b>	325,514
Accumulated amortisation	<b>(164,680)</b>	(123,536)
Closing net book amount	<b>160,834</b>	201,978
<b>Amortised cost at 31 December</b>	<b>49,218,761</b>	49,177,617

**12. Borrowings - continued**

During the year ended 31 December 2010, the Tumas Group issued 6.2% bonds maturing between 2017 and 2020 for an amount of €25,000,000 through Tumas Investments p.l.c. The net proceeds have been utilised by the company for the repayment of the loan granted by Tumas Investments p.l.c. in 2002, for the repayment of the private placement issued by the company in 2004 and its general financing needs. The company has guaranteed payment of all interest and capital relating thereto.

By virtue of an offering memorandum dated 7 July 2014, the group issued 5% bonds maturing in 2024 for an amount of €25,000,000 through Tumas Investments plc. The bonds are guaranteed by the company, which has bound itself jointly and severally liable for the payment of the bonds and interest thereon, pursuant to and subject to the terms and conditions in the offering memorandum.

Proceeds for these bonds have been advanced to the company through loans from fellow subsidiary.

The interest rate exposure of borrowings was as follows:

	<b>Group and Company</b>	
	<b>2016</b>	<b>2015</b>
	€	€
Total borrowings:		
At fixed rates	<b>49,218,761</b>	49,177,617
At floating rates	<b>9,071,533</b>	9,545,541
	<b>58,290,294</b>	58,723,158

Weighted average effective interest rates at the end of the reporting period date:

	<b>Group and Company</b>	
	<b>2016</b>	<b>2015</b>
Bank overdrafts	<b>4.4%</b>	5.4%
Bank loans	<b>4.2%</b>	4.3%
Loans from fellow subsidiaries	<b>5.7%</b>	5.7%

This note provides information about the contractual terms of the group's and company's interest-bearing loans and borrowings. For more information about the groups' and company's exposure to interest rate and liquidity risk, see Note 2.

**13. Trade and other payables**

	<b>Group</b>		<b>Company</b>

<b>Total trade and other payables</b>	<b>34,002,014</b>	29,973,476	<b>32,181,296</b>	28,230,235

Amounts owed to a fellow subsidiary, parent and related parties are unsecured, interest free and are repayable on demand except for an amount of €Nil (2015 : €2,207,163) which bears interest at Nil% (2015: 5%) and is not expected to be repaid within the next twelve months. The lender has the right to waive this interest for each financial year.

Institutional grants relate to funds advanced directly by the Government of Malta or other institutions to the company, co-financing its capital expenditure on the property, plant and equipment. Such funds are treated as deferred income and are credited to the profit and loss account on a systematic basis over the useful lives of the assets. The closing amount relates to the deferred portion of these grants to be credited to the profit and loss account on a systematic basis over the remaining useful life of the property, plant and equipment owned by the company.

The group's exposure to currency and liquidity risk related to trade and other payables is disclosed in Note 2.

**14. Deferred taxation**

**14. Deferred taxation - continued**

Deferred taxes are calculated on all temporary differences under the liability method and are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled based on tax rates (and tax laws) that have been enacted by the end of the reporting period. The principal tax rate used is 35% (2015: 35%), with the exception of deferred taxation on the fair valuation of non-depreciable property which as from 2015 is computed on the basis applicable to disposals of immovable property, that is, tax effect of 10% of the transfer value.

The hospitality arm of the group has been availing itself of investment aid under the various investment tax credit schemes that were applicable for hotels during 2015 and 2016.

With effect from 1 January 2015, the final tax on transfers of immovable property was reduced to 10% of the transfer value for property acquired before 1 January 2004. The net impact of the application of the changed tax regime on the deferred tax liability attributable to fair valuation of property amounted to €7,800,864 for the group and €6,807,642 for the company.

**15. Revenue**

The group's operations consists of the ownership of prime tourism and leisure properties, which include the operation of a hotel, the development of residential, rental and commercial property for trading and renting purposes and the provision of ancillary services to this industry. All these operations are conducted locally.

Trade and other receivables	<b>938,233</b>	7,143,503	<b>519,926</b>	8,163,802
Trade and other payables	<b>6,283,792</b>	12,928,564	<b>6,163,115</b>	12,856,307
Cash generated from operations	<b>19,467,228</b>	34,658,382	<b>17,049,867</b>	33,708,060

## 23. Commitments

### Capital commitments

At 31 December the group and company had capital commitments not provided for in these financial statements as follows:

	Group and Company			
	Contracted 2016 €	Not Contracted 2016 €	Contracted €	Not Contracted 2015 €
Inventory (property development)	-	<b>7,843,728</b>	2,971,395	14,036,847
Non-current assets	<b>3,685,624</b>	<b>7,124,490</b>	5,155,776	1,852,808
	<b>3,685,624</b>	<b>14,968,219</b>	8,127,171	15,889,655

**23. Commitments - continued**

**Operating lease commitments – where the group and the company are lessors**

The future minimum lease payments receivable under non-cancellable property operating leases are as follows:

	<b>Group</b>		<b>Company</b>	
	<b>2016</b>	2015	<b>2016</b>	2015
	€	€	€	€
Not later than 1 year	<b>2,103,237</b>	2,319,804	<b>1,300,000</b>	1,300,000
Later than 1 year and not later than 5 years	<b>3,288,586</b>	1,629,165	<b>3,900,000</b>	-
Later than 5 years	<b>539,642</b>	594,022	-	-
	<b>5,931,465</b>	4,542,991	<b>5,200,000</b>	1,300,000

The company's leases relate to an operating lease with a subsidiary. Refer to Note 5.

**24. Contingencies**

At 31 December 2016, the company had guarantees of €5,025,000 (2015: €8,209,935) issued on behalf of other fellow subsidiaries' bank facilities. The guarantees are supported by general and special hypothecs over the company's assets.

**25. Related party transactions**

The company forms part of the Tumas Group of Companies. All companies forming part of the Tumas Group are related parties since these companies are all ultimately owned by Tumas Group Company Limited which is considered by the directors to be the ultimate controlling party. Trading transactions between these companies include items which are normally encountered in a group context. The group is ultimately fully owned by members of the Fenech family, who are therefore considered to be related parties.

Related parties also include foreign Hilton hotels and related affiliates. Trading transactions with these related parties are entered into on a regular basis as a result of normal trading transactions, and mainly relate to corporate costs, management fees and operators' charges.

**24. Related party transactions - continued**

The following transactions were carried out with related parties:

	<b>Group</b>		<b>Company</b>	
	<b>2016</b>	2015	<b>2016</b>	2015
	€	€	€	€
<b>Income from services</b>				
Rents receivable from subsidiary	-	-	<b>1,300,000</b>	1,300,000
Rents receivable from fellow subsidiary	<b>595,122</b>	594,103	-	-
Maintenance fees receivable from subsidiary	-	-	<b>623,673</b>	525,409
<hr/>				
<b>Expenditure for goods and services</b>				
Net interest and similar charges payable to related parties	<b>2,619,569</b>	2,825,445	<b>2,719,070</b>	2,825,455
Management fees charged by fellow subsidiaries	<b>440,004</b>	446,604	<b>440,004</b>	446,604
Operators' charges and other fees payable to other related parties	<b>1,459,937</b>	2,234,250	<b>1,459,937</b>	2,234,250
Payroll recharges	<b>401,044</b>	385,915	<b>401,044</b>	385,915

Year end balances arising from related party transactions are disclosed in Notes 7, 13 and 17 to the financial statements.

During the year ended 31 December 2015, property with carrying value of €438,728 was transferred to a fellow subsidiary within Tumas Group as part of an internal restructuring programme between the group and other fellow subsidiaries forming part of the Tumas group.

**25. Statutory information**

Spinola Development Company Limited is a limited liability company and is incorporated in Malta.

The immediate parent company of Spinola Development Company Limited is Spinola Investments Limited, a company registered in Malta, with its registered address at Tumas Group Corporate Office, Level 3, Portomaso Business Tower, Portomaso, St. Julians, Malta. Spinola Investments Limited is exempt from the preparation of consolidated accounts by virtue of section 174(1)(a) of the Companies Act, 1995.

The ultimate parent company of Spinola Development Company Limited is Tumas Group Company Limited, a company registered in Malta, with its registered address at Tumas Group Corporate Office, Level 3, Portomaso Business Tower, Portomaso, St. Julians, Malta.

The ultimate controlling parties of Spinola Development Company Limited are the spouse and descendents of the group's deceased founder, Mr. Thomas Fenech.

**26. Comparative information**

Comparative figures disclosed in the main components of these financial statements have been reclassified to conform with the current year's presentation format for the purpose of fairer presentation.
